GREAT LAKES IMMUNODERMATOLOGY EXCHANGE 4.0

THANK YOU TO OUR SPONSORS

Platinum

Gold

Silver

Welcome to the 2022 edition of the **Great Lakes Immunodermatology Exchange (GLIDE) 4.0: Catching up with the expanding knowledge and treatments in immunodermatology.**

Immune diseases and immune-based therapies continue to evolve, and the new landscape—and challenges—are exciting.

This program will focus on new concepts, therapeutic options, real-world practice issues, and how we as dermatologists can advocate for our patients. The fall program brings together medical dermatologists, dermatology nurses and allied professionals who participate in the management of patients with immune-dermatological conditions. The distinguished faculty will discuss topics of high interest and we welcome your contribution.

We hope you enjoy the program and come away with new knowledge, stronger collaborations, and practical clinical resources.

We would like to thank everyone involved for bringing continued success to this important exchange. We look forward to the **GLIDE 4.5** meeting, to be held **VIRTUALLY** in the **spring of 2023**.

Your feedback is welcomed and greatly appreciated.

Sincerely,

Neil Shear, MD FRCPC FACP
Co-Chair

Perla Lansang, MD FRCPC
Co-Chair

Friday, October 21, 2022

6:00 pm – 9:00 pm	Registration and Welcome Reception
7:30 pm – 8:15 pm	“Great Takes” with Neil Shear, MD

Saturday, October 22, 2022

Morning Program

7:00 am – 8:00 am	Breakfast	
8:00 am – 8:30 am	Welcome and Introduction	Drs. Perla Lansang and Neil Shear, Co-chairs
Session 1		Moderator: Dr. Philip Doiron
8:30 am – 8:50 am	Food allergy in atopic dermatitis - an allergy perspective	Vipul Jain, MD
8:50 am – 9:00 am	Q & A	
9:00 am – 9:20 am	Panniculitis made easy: a practical approach	Afsaneh Alavi, MD
9:20 am – 9:30 am	Q & A	
9:30 am – 9:50 am	How pathology can help in tough cases of immune-mediated dermatological disease	Mike Sidiropoulos, MD
9:50 am – 10:00 am	Q & A	
10:00 am – 10:20 am	“Great Breaks”	Meet our industry partners in the Atrium
<i>Reminder: Check out time is 11:00 AM</i>		
Session 2		Moderator: Dr. Philip Doiron
10:20 am – 10:40 am	Cutaneous Lupus: more complexity to consider	Janet Pope, MD
10:40 am – 10:50 am	Q & A	
10:40 am – 10:50 am	Safety of JAKis: an update	Jan Dutz, MD
11:10 am – 11:20 am	Q & A	
11:20 am – 11:40 am	“Great Takes”	Perla Lansang, MD
11:20 am – 11:40 am	Q & A	
11:50 am – 12:40 pm	“Great Breaks” - Lunch	Meet our industry partners in the Atrium

Saturday, October 22, 2022

Afternoon Program

Session 3		Moderator: Dr. Perla Lansang
12:40 pm – 1:00 pm	What's new in topical immunomodulation?	Melinda Gooderham, MD
1:00 pm – 1:10 pm	Q & A	
1:10 pm – 1:30 pm	Why am I still fascinated by pustular psoriasis?	Sonja Molin, MD
1:30 pm – 1:40 pm	Q & A	
1:40 pm – 2:00 pm	How NMA data should impact your decision making	Aaron Drucker, MD
2:00 pm – 2:10 pm	Q & A	
2:10 pm – 2:30 pm	<i>"Great Breaks" – Lunch</i>	<i>Meet our industry partners in the Atrium</i>
Session 3		Moderator: Dr. Perla Lansang
2:30 pm – 3:10 pm	Panel Discussion	GLIDE 4.0 Faculty
3:10 pm – 3:30 pm	Treatment considerations for systemic treatment in children with inflammatory skin disease	Marissa Joseph, MD
3:30 pm – 3:40 pm	Q & A	
3:40 pm – 4:00 pm	Draw and Closing Remarks	Drs. Perla Lansang and Neil Shear, Co-chairs

Stay tuned to [derm.city](http://www.derm.city) for post-congress updates, newsletters and The Chronicle of Skin & Allergy!

Neil H. Shear, MD FRCPC FACP

Dr. Shear is the former Head of Dermatology, Sunnybrook Health Sciences Centre, Toronto, ON, and Director, Drug Safety Research Group, University of Toronto. Dr. Shear has been President of the Canadian Dermatology Association and President of the Canadian Dermatology Foundation. Dr. Shear was recently honoured with the title of Professor Emeritus at the University of Toronto.

Dr. Shear earned his medical degree at McMaster University, Hamilton, ON, in 1976, and completed training in both internal medicine and dermatology. He completed a fellowship in clinical pharmacology at the Hospital for Sick Children, Toronto, ON. Prior to his medical training, Dr. Shear received a degree in engineering science from the University of Toronto.

While Dr. Shear's main research interest is in idiosyncratic drug reactions involving the skin, his clinical interests are diverse, ranging from rosacea and camouflage makeup to autoimmune blistering diseases. Dr. Shear has conducted numerous clinical trials in dermatology, from first in human early pharmacology studies to large randomized trials of novel therapeutics.

Perla Lansang, MD FRCPC

Dr. Lansang is Assistant Professor, Division of Dermatology, University of Toronto, Toronto, ON. She is the head of the Division of Dermatology at Sunnybrook Health Sciences Centre, where she sees general medical dermatology patients and holds a pregnancy dermatology clinic. Additionally, Dr. Lansang runs a clinic at the Phototherapy Education and Research Centre, Women's College Hospital, and maintains a pediatric psoriasis clinic at the Hospital for Sick Children.

After obtaining a degree in internal medicine from the University of the Philippines, Manila, the Philippines, Dr. Lansang completed two years of fellowship in pediatric dermatology at the Hospital for Sick Children; as well as a fellowship in medical dermatology with special interest in psoriasis at Sunnybrook Health Sciences Centre.

Philip Doiron, BSc (Pharm), MSc HSEd, MD, FRCPC

Dr. Doiron completed a degree in pharmacy at Dalhousie University, medical school at McMaster University, dermatology residency at the University of Toronto, and a fellowship in HIV dermatology and male genital skin disease at the Chelsea & Westminster Hospital in London, UK. He also holds a Master's in Health Science Education from McMaster University. He currently works as an Assistant Professor and Clinician Teacher at Women's College Hospital, and the University Health Network. He is the Program Director for the Dermatology Residency Program at the University of Toronto.

PRESENTERS

Vipul Jain, MB BS, FRCPC
McMaster University, Hamilton, ON

Food allergy in atopic dermatitis - an allergy perspective

Dr. Jain is originally from Niagara Falls, Ontario. He obtained his Bachelors in Medicine and Bachelors in Surgery from KMC, India.

Thereafter, he trained in Internal Medicine at Memorial University of Newfoundland. He completed his Fellowship in Allergy & Clinical Immunology from the University of Manitoba. He now has 2 practices- based out of Niagara Falls and Stoney Creek, Ontario.

He is a fellow of The Royal College of Physicians & Surgeons of Canada, an active member with Canadian Society of Allergy and Clinical Immunology, American Academy of Allergy, Asthma and Immunology, ACDS, and an adjunct professor with McMaster university. He is a principal investigator with Probitry Medical Research and the director for Allergy Research Canada. His primary interests include Atopic Dermatitis, Asthma, Food Allergies, and CSU.

Afsaneh Alavi, MD
Mayo Clinic, Rochester, MN

Panniculitis made easy: a practical approach

Dr. Alavi is a Professor of Dermatology at Mayo clinic in Rochester Minnesota. Dr. Alavi completed her residency in dermatology in 1998 in Iran, and in 2011 in Toronto, Canada. She also completed a 2-year fellowship in Wound Healing and a Master of Science in Community Health at the University of Toronto. Her research interests include wound healing, hidradenitis suppurativa, and complex medical dermatology. Dr. Alavi received multiple awards including the Practitioner of the Year Award from the Canadian Dermatology Association in 2017, the Hidradenitis Suppurativa Award for HSF foundation in 2019, and recently the supervisor of the year award from Department of Dermatology at Mayo clinic in 2022. She has been Principle Investigator on more than 50 clinical trials and has published extensively in peer-reviewed journals.

Michael Sidiropoulos, MD, MSc, FRCPC (Derm, Path), DABD, FCAP, FASDP
Sunnybrook Health Sciences Centre, Toronto, ON

How pathology can help in tough cases of immune-mediated dermatological disease

Dr. Michael Sidiropoulos is a board-certified dermatologist, pathologist, and dermatopathologist, in both Canada and the United States. He completed his undergraduate training in the immunology specialist program and graduate studies in pathology both at the University of Toronto. Dr. Sidiropoulos completed his medical degree, and pathology and dermatology residency training, all at the University of Toronto and a dermatopathology fellowship at Northwestern University, Chicago. He works both in academic and community settings in both dermatology and dermatopathology.

Janet Pope, MD, MPH, FRCPC
Western University, London, ON

Cutaneous lupus: more complexity to consider

Dr. Pope is a Professor of Medicine in the Division of Rheumatology at the Schulich School of Medicine, University of Western Ontario. She is the Division Head in Rheumatology at St. Joseph's Health Centre in London. Dr. Pope obtained her MD, and Fellowship in Internal Medicine at the University of Western and a Fellowship in Rheumatology and Master of Public Health from Boston University. She then completed a Canadian Arthritis Society Research Fellowship in Scleroderma.

Jan Dutz, MD, FRCPC
University of British Columbia, Vancouver, BC

Safety of JAKis: an update

Dr. Dutz is Professor and Head of the Department of Dermatology and Skin Science at the University of British Columbia. He is a Senior Scientist with the BC Children's Hospital Research Institute, where his research focus is the skin immune system and the manipulation of this system to promote immune responses and induce tolerance. He is a rheumatologist and dermatologist with special clinical interest in the cutaneous manifestations of autoimmunity and rheumatic disease.

Melinda Gooderham, MSc, MD, FRCPC
Queen's University, Kingston, ON

What's new in topical immunomodulation?

Dr. Gooderham is a Dermatologist and Medical Director at the SKiN Centre for Dermatology and an Investigator with Probit Medical Research. She is an Assistant Professor at Queens University and a Consultant Physician at the Peterborough Regional Health Centre. She is a fellow of the Royal College of Physicians and Surgeons of Canada. She received her MD from the University of Western Ontario in 1999, and then completed her Dermatology residency at the University of Toronto in 2004. Prior to training in medicine, Dr. Gooderham obtained a Bachelor of Science from Queens University in Kingston in 1992, and a Master of Science from the University of Guelph in 1995.

Dr. Gooderham is actively involved in teaching medical students, residents, nurse practitioners and physicians with both didactic and clinical hands-on teaching. She practices with a focus on psoriasis, atopic dermatitis, skin cancer and clinical research. She also contributes to several peer-reviewed dermatology publications as an author and reviewer.

Sonja Molin, MD
Queen's University, Kingston, ON

Why am I still fascinated by pustular psoriasis?

Dr. Sonja Molin is an Associate Professor and Chair of the Division of Dermatology, Department of Medicine at Queen's University. Dr. Molin completed her training in Dermatology and Allergology at the Ludwig Maximilian University in Munich, Germany, where she worked for 11 years before she joined Queen's University in May 2018. The main focus of her clinical expertise and research are inflammatory skin diseases, mainly hand eczema and psoriasis, contact allergy and occupational dermatology. She has published more than 50 peer-reviewed articles and book chapters and was awarded a number of research prizes.

Aaron Drucker, MD, ScM, FRCPC
University of Toronto, Toronto, ON

How NMA data should impact your decision making

Dr. Drucker is a dermatologist and researcher focusing on epidemiology and evidenced-based treatment of skin disease. Through his research, Dr. Drucker aims to improve the lives of people with or at risk for inflammatory and neoplastic skin disease by evaluating risk factors, comorbidities, health service utilization and evidence-based treatments.

Dr. Drucker's research is currently helping patients and clinicians navigate new treatments available for eczema (atopic dermatitis). This is an exciting time for individuals with eczema as there are many new treatments being studied to help those with more severe disease, where topical treatments are not enough. Dr. Drucker leads an international team conducting a living network meta-analysis of systemic immunomodulatory treatments for eczema. Through EczemaTherapies.com, this team is committed to providing the most up-to-date information on treatments for eczema to share with patients and clinicians.

Dr. Drucker is also focused on the safety of medications used in dermatology, particularly in older adults. He is currently working on a study examining the effects of oral steroids on older people with eczema and a Canadian Institutes of Health Research (CIHR) funded study to evaluate the safety of biologic medications for older adults with psoriasis and psoriatic arthritis.

Marissa Joseph, MD, MScCH, FRCPC (Pediatrics), FRCPC (Dermatology)
University of Toronto, Toronto, ON

Treatment considerations for systemic treatment in children with inflammatory skin disease

Dr. Marissa Joseph is a board-certified Pediatrician and Dermatologist in Canada and the US and is full-time academic faculty at the University of Toronto. She has received and has been nominated for teaching awards in both undergraduate and postgraduate medical education. She also completed an MSc in Community Health at the Dalla Lana School of Public Health.

Dr. Joseph is the Medical Director of the Ricky Kanee Schachter Dermatology Centre at Women's College Hospital. She also works at the Hospital for Sick Children where she manages children with complex dermatologic disease in outpatient and inpatient settings, as well as a pediatric laser treatment program.

Dr. Joseph enjoys her diverse practice in general adult, pediatric, and surgical dermatology. Her clinical and research interests include inflammatory skin disorders such as psoriasis, atopic dermatitis, and hidradenitis suppurativa; genodermatoses; and equity, diversity and inclusivity.

Pros and cons of food testing for AD patients

Vipul Jain, MD

1. Identify a question, idea or controversy you would like to answer or address:

2. Identify a stimulus for the above:

3. Define how you will approach the problem (resources or references):

4. Report the learning outcome(s). How will this impact your clinical practice, expertise or current knowledge base?

5. Record the number of hours: _____
